

The leading manufacturer of award-winning security products

Stunning product design, exceptional attention to detail. Each and every Texecom product delivers outstanding performance. With a diverse portfolio of innovative market-leading designs, ranging from high-end insurance approved systems to cost sensitive domestic installations, Texecom's product range sets new standards in security excellence.

Texecom

Detectors

6

With more than 10 million detectors sold around the world, Texecom's experience in detection technologies is unsurpassed. Every motion, fire and perimeter detector achieves exceptional performance.

Control Panels

22

An established market leader, Texecom control panels provide greater system flexibility, expansion, communication and above all, ease of use.

External Sounders

38

Simply the best. The Odyssey Series has revolutionised external sounder design, comprising tough rugged mechanics with uncompromising performance.

Wireless

44

Providing stand-alone and integrated hybrid wireless solutions, Texecom's wireless products increase system flexibility and provide additional installation options.

Power Supplies

48

With full signalling integration compatibility with Premier Control Panels, Texecom power supplies provide more than just dependable performance, completing the range of system solutions.

Product Tables

50

The at-a-glance look-up tables provide instant access to product features and allow quick and easy comparisons across Texecom's product range.

Global Provider of Security Solutions

Texecom is an award-winning manufacturer of intruder alarm products, including a full range of motion detectors, control panels, perimeter protection devices, heat and smoke detectors, external sounders, power supplies and wireless peripherals.

As an international leader in security technologies, Texecom products protect people and property throughout the world. Texecom products and peripherals have been specifically designed for the international market, through extensive dialogue with Texecom's global distributors and installers.

Texecom is a member of the Halma Group of Companies.

UK Manufacturing For Complete Control

Complete control for all aspects of development is ensured through design and manufacture of all products in state-of-the-art UK facilities. These facilities include injection moulding manufacturing and electronic PCB assembly utilising the latest surface mount and multi-head insertion machinery. All production lines are computerised and each individual product is fully tested for total quality.

A combination of barcode labelling and computerised monitoring provide full traceability with comprehensive data recorded for each individual product. Each component in every unit is 100% tested for total quality.

Design Philosophy

Each and every Texecom product starts with the same simple design philosophy, to out-perform all other products in its class.

With a passion and a focus on performance, simplicity of operation, style and reliability, product requirements are engineered into leading edge designs, outstanding in both quality and innovation.

Customer Focus

Providing a multi award-winning level of service and training, Texecom delivers a standard of customer care and support unparalleled in the industry.

Featuring dedicated technical support, multilingual international customer services and a range of product training options, a competitive advantage is guaranteed to installers of Texecom products.

As a world leader in the design and manufacture of quality security equipment, Texecom is firmly committed to producing products that exceed the demands of both European and international standards. The introduction of new European Standards has provided new challenges and created new responsibilities for manufacturers and installers of intruder alarm systems.

Texecom prides itself on producing innovative products, designed to exceed expectations. Every product within the range is fully compliant with the requirements of the European Standard EN 50131.

Texecom can also confirm that all products, where applicable, comply with the requirements of the European Component Standards:

PIR Detectors = TS 50131-2-2

Dual Technology Detectors = TS 50131-2-4

Magnetic Contacts = TS 50131-2-6

Control Panels & Ancillaries = TS 50131-3

Wireless Peripherals = TS 50131-5-3

Communicator Modules = EN 50136-2-3

Power Supplies = EN 50131-6

Texecom can provide complete security system solutions for Grade 1, 2 and 3 of the European Component Standards.

Grade 3 compliant products include Prestige AM Series Detectors, Impaq Series Perimeter Protection Devices, Premier Series Control Panels, Premier Keypads, Premier Expanders, Premier Communicator Modules, Premier Power Supplies and Odyssey Series External Sounders.

Texecom's Grade 2 compliant product range consist of Prestige Series Detectors, Classic Series Detectors, 3D Series Detectors, RF Series Detectors, Mirage Series Detectors, Premier International Series Control Panels, Veritas R8 Plus & Veritas Excel Control Panels, Veritas Keypads and RadioPlus Series.

Each product is EN 50131 graded within this product guide, with complete listings available on page 51 for ease of reference.

EN 50131-1 Product Grading Key:

G1 = EN 50131-1 Grade 1

G2 = EN 50131-1 Grade 2

G3 = EN 50131-1 Grade 3

Texecom Registered Installer Scheme

If you are a professional security installer and you would like to be kept up to date with the latest product launches and news from Texecom, along with a host of additional benefits, you need to become a Texecom Registered Installer.

Once registered you will receive the following exclusive benefits:

Latest product information

Access to the secure areas of the Texecom website

Downloadable software and product installation manuals

Freephone technical helpline †

Free product training †

† Available for UK registered installers only

Applications can be filed online at www.texecom.com

Texecom's commitment to uncompromising product design has been recognised by the worldwide security industry in achieving numerous product and corporate awards. All Texecom products are designed to comply fully with British, European and International standards for safety and performance and have obtained excellent ratings confirmed by independent test results.

Texecom products are protected by UK and international patents, trademarks and registered design rights.

Detectors

As a company originally specialising purely in detection devices, Texecom is an established world-leader in sensing technologies. Always innovating and developing next-generation products, Texecom's acclaimed portfolio of motion, perimeter and fire detectors surpass industry standards and exceed customer expectations.

Each Texecom detector shares the same key design philosophies and quality engineering, ensuring critical advantages to both installation engineers and end-users alike. With stunning aesthetics, state-of-the-art electronics and superior mechanics as standard throughout the range, Texecom detectors are guaranteed to perform.

Prestige Series - Motion Detectors 8

Next-generation motion detectors in a common range of easy to install housings.

Classic Series - Motion Detectors 12

Established market-leading brands with millions of proven installations world-wide.

3D Series - Motion Detectors 13

Holographic Optical Technology provides a superior optical system for additional performance.

RF Series - Motion Detectors 14

Enhanced electronic design provides additional stability in commercial environments.

Mirage Series - Motion Detectors 15

Quad and Dual Technology detectors for harsh environments.

Impaq Series - Perimeter Detectors 16

Intelligent acoustic and vibration detectors providing alarm indication before intruders gain entry to premises.

Exodus Series - Fire Detectors 18

Complete range of fire detectors available for connection to security or conventional fire control panels.

Prestige Series

Inspired by a design philosophy of contemporary styling combined with the most advanced detection performance, the Prestige Series is intended for those who demand the very best. The result? A timeless series of motion detectors that surpass security system requirements.

With a selection of interchangeable detection technologies, advanced anti-masking security, miniature housings and mirrored optics, the Prestige Series guarantees world-class detector performance.

Anti-Masking Detectors

Prestige AMQD Plus G3

Grade 3 anti-masking digital quad PIR. Genuine quad element detection provides exceptional performance. Active IR anti-masking, Triple End-Of-Line (T-EOL) signalling, wall tamper detection and local & remote test facilities exceed requirements for EN 50131-1 and TS 50131-2-2 Grade 3.

Prestige AMDT Plus G3

Grade 3 anti-masking digital dual technology detector. Features fully adjustable microwave range and digital PIR temperature compensation. Active IR anti-masking, Triple End-Of-Line (T-EOL) signalling, wall tamper detection and local & remote test facilities exceed requirements for EN 50131-1 and TS 50131-2-4 Grade 3.

Prestige AM360 QD G3

Grade 3 anti-masking digital quad PIR. Omni-directional Quad Element Pyro for True 360° Coverage. Active IR anti-masking, Triple End-Of-Line (T-EOL) signalling, ceiling tamper detection and local & remote test facilities exceed requirements for EN 50131-1 and TS 50131-2-2 Grade 3.

Prestige Series

Interchangeable Detectors

Prestige IR

G2

High immunity PIR with interchangeable electronics module. Multi mode digital pulse count maximises detector performance. ICC™ (Intruder Confirmation Circuitry) ensures false alarm immunity from RF, lightning and mobile phones.

Prestige TD

G2

Twin dual element PIR with interchangeable electronics module. Two dual element sensors provide exceptional stability, ideal for commercial applications. Features advanced microprocessor design and digital temperature compensation.

Prestige QD

G2

Quad element digital PIR with interchangeable electronics module. Genuine quad detection provides additional stability for harsh environments. Features advanced microprocessor design and digital temperature compensation.

Prestige DT

G2

Digital dual technology detector with interchangeable electronics module. X-band doppler, adjustable microwave range, digital temperature compensation and advanced signal processing ensures maximum false alarm immunity. CloakWise™ (CW) version also available.

Prestige Series

Mirrored Detectors

Prestige MI

G2

PIR with mirrored optics. Cost effective mirrored PIR with exceptional price performance ratio. 40m long range version also available.

Prestige PW

G2

Pet immune detector with mirrored optics. Excellent animal discrimination ensures class-leading performance.

Prestige MR

G2

Digital PIR with mirrored optics. Advanced optical system and digital signal processing guarantee exceptional catch-performance. 40m long range version also available.

Compact Detectors

Prestige Compact IR

G2

Miniature cost effective PIR. Surface mount signal processing provides exceptional reliability.

Prestige Compact XT

G2

Digital miniature PIR. Digital temperature compensation delivers excellent catch performance even in extreme temperature conditions.

3D Series

Utilising Texecom's proprietary Holographic Optical Technology, the 3D Series achieves a level of performance previously unobtainable in the residential marketplace. This technology has been further enhanced using patented vertical beam shaping techniques to create a revolutionary pet immune detector.

3D Pro

G2

Surface mount PIR with Holographic Optical Technology. Superior white light rejection and optimum IR focusing for sharper detection.

3D Quad

G2

Quad element surface mount PIR with Holographic Optical Technology. Enhanced catch performance and false alarm immunity with active white light rejection and optimum IR focusing.

3D PetWise

G2

Pet immune surface mount PIR with Holographic Optical Technology. IR beam shaping technology ensures excellent pet immunity whilst maintaining sensitivity in lower coverage areas.

Mirage Series

The Mirage Series comprises advanced technology suitable for operation in the harshest environments. The range includes dual technology, pet immune and genuine quad element detectors for ultimate false alarm immunity.

Mirage Dual Technology

G2

Dual technology state-of-the-art microwave and PIR detector. Fully adjustable microwave range, digital temperature compensation and neural based learning ensures optimum performance in any environment.

Mirage DT PetWise

G2

Pet immune dual technology detector. IR beam shaping coupled with microprocessor analysis of both PIR and microwave signals allows reliable pet immunity of up to 100 lbs (45kg).

Mirage Quad

G2

Advanced quad element PIR with superior surface mount signal processing. Excellent stability in harsh environments whilst maintaining catch performance.

Impaq Series

The Impaq Series is a range of intelligent perimeter detection devices. With both acoustic and vibration detection options, these outstanding products provide exceptional performance with class-leading false alarm immunity.

Impaq Series

The Impaq Series of perimeter protection devices achieves additional security by enabling detection prior to intruder entry, providing an ideal solution for confirmed alarm systems.

Impaq E

G3

Cost effective shock sensor with dual sensitivity range. Easy set-up procedure and fully adjustable range ensure excellent performance.

Impaq Plus

G3

Digital shock sensor with advanced signal processing. Tri-colour LED indication guarantees correct sensitivity whilst microprocessor control provides unparalleled false alarm immunity.

Impaq Plus with Magnetic Contact

G2

Digital shock sensor with magnetic contact and advanced signal processing. Double reed switches increase installation flexibility. Allows installation of one device for double protection on opening doors and windows.

Impaq Glass Break

G3

Advanced digital acoustic glassbreak detector. Quad real time frequency analysis coupled with digital flex detection ensure outstanding performance for plate, tempered, laminated and wired glass types.

Exodus Series

With a range of different detection and alarm criteria, the Exodus Series offers a complete heat and smoke sensing solution for even the most diverse of installations. Featuring a heat enhanced optical multisensor for maximum detection performance plus a selection of heat detectors, all available for both conventional fire and 12V security panel formats, this EN54 BSI Kitemark approved range of detectors offers comprehensive performance.

Exodus OH

Optical and heat multisensor. Heat enhancement ensures high sensitivity to fast burning fires whilst optical chamber provides exceptional false alarm immunity.

Exodus RR

Rate of Rise heat detector. Suitable for use where smoke or dust is prevalent, with fastest heat detection performance.

Exodus FT64

Fixed 64°C heat detector. Suitable for use where smoke or dust is prevalent with superior false alarm immunity.

Exodus FT90

Fixed 90°C heat detector. Suitable for use where smoke or dust is prevalent, ideal for extreme high ambient temperatures.

Exodus Series

Exodus OH - EN54-7 Optical & Heat Multisensor

The Exodus OH Optical and Heat Multisensor provides fast detection for all types of fire, ensuring maximum responsiveness and performance. By combining digital temperature measurement with state-of-the-art optical smoke sensing technology, both slow burning smouldering fires and fast burning flaming fires are detected with equal reliability.

Superior Optical Design

The Exodus OH features an innovative integrated optical chamber which maximises the volume of smoke analysed whilst maintaining an unobtrusive and elegant aesthetic design. With a large smoke sample size, Texcom's proprietary digital signal processing algorithms can detect genuine alarms rapidly without compromising false alarm immunity.

Heat Enhancement For Fast Burning Flaming Fires

"Optical only" smoke detectors respond well to slow burning smouldering fires due to large smoke particles providing a significant increase in optical signal. However, these designs have a slow response to fast burning flaming fires where the smoke particle size is small. By utilising digital thermal technology, the Exodus OH Optical and Heat Multisensor recognises sudden increases in temperature and changes the sensitivity of the optical chamber accordingly. This "heat enhancement" enables the rapid detection of fast burning flaming fires whilst maintaining the excellent false alarm immunity of a superior optical smoke detector.

Heat Only Alternatives

Where environmental conditions make the use of an optical and heat multisensor unsuitable, the Exodus Series of heat detectors provide a range of rate of rise and fixed temperature solutions. Each featuring state-of-the-art digital microprocessor technology and fully complying with EN54-5, a choice of detection criteria ensures the optimum balance between detection rate and false alarm immunity for any specific installation.

Exodus Series

BSI Kitemark Approval

Texcom has successfully underlined the quality and safety of the Exodus Series by becoming the first company in the world to be awarded the prestigious BSI Kitemark for EN54-5 & EN54-7 certified detectors.

The Kitemark has been established as the leading certification mark in the UK for over 100 years and provides specifiers and consumers alike with confidence in the quality of the product and reassurance that the product is fit for the purpose for which it is intended. The Kitemark is the ultimate sign of quality and safety.

As the first manufacturer to design EN54 Kitemark detectors for commercial fire alarm system applications, Texcom has ensured that the Exodus Series is at the forefront of fire detection performance and reliability.

Selection Guide

Exodus OH Optical & Heat Multisensor	Detects	Smouldering fires and fast flaming fires
	Suitable For	Fastest detection for wide range of fires.
	Unsuitable For	Environments with airborne contamination (smoke, dust, steam)
	Label Colour	Blue
Exodus RR Rate of Rise Heat Detector	Detects	Rapid temperature increases or temperatures above 58°C
	Suitable For	Fast fire detection where normal temperatures do not exceed 38°C
	Unsuitable For	Environments where the temperature may change rapidly
	Label Colour	Green
Exodus FT64 64°C Fixed Temperature Heat Detector	Detects	Temperatures above 64°C
	Suitable For	Fire detection where rapid temperature changes occur
	Unsuitable For	Fast detection of slow burning fires or where normal temperatures exceed 44°C
	Label Colour	Orange
Exodus FT90 90°C Fixed Temperature Heat Detector	Detects	Temperatures above 90°C
	Suitable For	Environments where temperatures up to 70°C occur normally
	Unsuitable For	Fast detection of slow burning fires
	Label Colour	Red

Features & Functions

	Exodus OH	Exodus RR	Exodus FT64	Exodus FT90
12V/4-wire Operation With Alarm Relay	4W	4W	4W	4W
Conventional Fire 10V-30V Operation	CF	CF	CF	CF

Control Panels

The new leader in security control panel technologies, Texecom provides complete integrated system solutions unparalleled in quality and performance.

From the class-leading Veritas Series for domestic and small commercial applications, to the all-encompassing Premier Series of high-end communicating control panels, Texecom has a control panel solution to suit any installation requirement.

Premier Series

24

As a complete range of expandable, communicating control panels, the Premier Series is the pinnacle of control and indicating equipment design.

Premier International Series

26

Designed primarily for the international marketplace, the Premier International Series is a range of fully customisable control panels, providing outstanding performance and exceptional flexibility.

Premier Keypads

28

A selection of LCD and LED keypads, all designed to excel in any surroundings. Each featuring state-of-the-art leading edge design, performance, ergonomics and ease of use as standard.

Premier Expanders

30

Providing a complete range of expansion modules including zone expanders, output expanders and iD technology, system flexibility is maximised for future-proof installations.

Premier Communicators

31

With a variety of protocols, interface formats and transmission routes, the Premier Communicator range fulfils any signalling requirement. Now featuring IP technology, Premier control panels can be connected to Local or Wide Area Networks.

Home Automation & Access Control

32

Featuring X-10 compatibility for home automation and wiegand reader integration for access control, a Premier control panel can provide more functionality and building management functions.

Premier Software & Peripherals

33

With the most intuitive user-interface on the market, Texecom's upload/download software provides complete control.

Veritas Series

34

The market-leading range of residential and light commercial control panels. The Veritas Series continues to feature outstanding functionality and exceptional reliability.

Speech Diallers

36

Stand-alone speech and text communicators, ideal for systems that do not require police response or for secondary signalling purposes.

Premier Series

Engineered for professional installations, the Premier Series provides unsurpassed flexibility in all areas of system design and performance. High level menu driven programming via a comprehensive range of LCD keypads simplifies even the most complex design requirements, minimising set up time and maximising reliability.

Installation is further simplified by a host of innovative features including multiple terminals per zone for ease of wiring. Where communication of system events is a priority, a wide range of plug-on multi-protocol communicators are available plus full upload/download via Wintex™ software.

Premier Keypads

The keypad is the most important and identifiable product in any installation. As the control panel interface, both end-users and installation engineers alike utilise the keypad more than any other security device. With such repeated visibility and interaction, specifying a high performance and design conscious keypad is vital as it inherently represents the quality of the entire security system.

Each Premier keypad creates an outstanding user-interface. With timeless classical styling, superb high quality engineering, ease-of-use and a host of additional features, a Premier Keypad will provide years of exceptional service.

Proximity Tag Compatibility

Premier LCDP and LCDLP keypads feature a built-in proximity tag reader. This provides compatibility with Texecom Proximity Tags which simulate a valid user code, simplifying keypad operation and minimising user error.

Touchtone Keys

Each and every key within a Premier keypad features touchtone authentication, ensuring a positive response and reinforcing successful key operations.

Tactile Feel

Using the highest quality materials, Premier keypads feature precision engineering in the tactile feel and responsiveness of each key operation, providing greater user confidence.

Backlighting

Superior LED illumination and considered mechanical construction ensure high visibility backlighting for low level lighting conditions.

Ergonomic Design

With careful positioning and spacing of each user-operable feature, Premier keypads are simple, easy and efficient to use.

Premier Keypads

The Premier control panels accept a stunning range of quality keypads guaranteed to compliment any installation environment. Featuring intuitive operation, ergonomic design, touchtone backlit keys, high visibility LED indication, menu driven LCD displays, proximity tags and flush mount design, each type and style of keypad delivers reliable, dependable performance.

LED Keypads

RKP4/8/16

G2

4, 8 and 16 zone LED remote keypads compatible with Premier International Series control panels.

RKP8Plus/16Plus

G3

8 & 16 zone LED remote keypads incorporating 2 EOL zones.

LCD Keypads

LCD/LCDP

G3

Remote keypads with standard 32 character LCD display. Incorporates 2 DP or EOL zones and 1 programmable output. LCDP features built-in proximity tag reader.

LCDL/LCDLP

G3

All the features of the LCD/LCDP plus large 32 character LCD and a speaker driver output for programmable volume control. LCDLP features built-in proximity tag reader.

Flush Mount Keypads

Polished Chrome

G3

Polished chrome flush mount versions of the LCD/LCDP/LCDL/LCDLP available.

Satin Chrome

G3

Satin chrome flush mount versions of the LCD/LCDP/LCDL/LCDLP available.

Polished Brass

G3

Polished brass flush mount versions of the LCD/LCDP/LCDL/LCDLP available.

Polymer

G3

Polymer flush mount versions of the LCD/LCDP/LCDL/LCDLP available.

† For Arming/Disarming Only

Premier Expanders

A complete range of expansion modules allows modular system design, ensuring maximum flexibility and future-proof installations.

Premier 4XP

Remote Zone Expander for use with the Premier Series. Provides an additional 4 programmable DP or EOL zones and 2 programmable outputs. Module replaces two keypads for additional zone expansion.

Premier 8XP

Remote Zone Expander for use with the Premier Series. Provides an additional 8 programmable DP or EOL zones, 8 programmable outputs, 1 auxiliary input and a speaker driver output with programmable volume control.

Premier 8X

Remote Zone Expander for use with the Premier International Series. Provides an additional 8 programmable EOL zones, 2 programmable outputs and a speaker driver output with programmable volume control.

Premier 8XE

Local plug-on Zone Expander for use with the Premier International Series and Premier 24 control panel. Provides an additional 8 programmable EOL zones.

Premier OP8

Plug-on Output expander for use with the Premier Series control panel. Provides an additional 8 programmable outputs, each rated at 100mA negative applied.

Premier OP16

Remote Output expander for use with the Premier Series of control panels. Provides an additional 16 programmable outputs, each rated at 100mA negative applied.

Premier 24iXD

24 zone iD[†] expansion module for use with the Premier 24 control panel.

Premier 60iXD

Expansion module providing two iD[†] loops each supporting 30 iD[†] biscuits. Includes fused 12V output for powering detectors plus engineer's keypad port for local iD[†] diagnostics.

Premier PSU200XP

Premier 8XP expander with 2 Amp power supply module which is fully monitored by the host control panel.

Premier RM8

Relay Module for use with the Premier Series and Premier International Series of control panels. Provides 8 additional relay switch outputs.

[†] iD is a trademark of Novar Systems Ltd.

Premier Communicator Modules

Texecom's range of communicator modules provides reliable, flexible and interchangeable signalling options. A variety of protocols, interface formats and multi-path transmission routes guarantee a communication solution to suit any installation requirement.

Premier Com300

The Premier Com300 is a plug-on multi-protocol digital communicator/300-baud modem. Enables full upload/download and system programming diagnostics.

Premier Com2400

The Premier Com2400 is a plug-on multi-protocol digital communicator/2400-baud modem enabling SMS text messaging. Enables full upload/download and system programming diagnostics.

Premier ComGSM

Provides SMS text messaging for communication of alarm events, remote control and remote diagnostics. Additionally enables dual signalling and full upload/download[†] when used in conjunction with plug-on communicator modules.

RP9 RadioPad

Secure wireless multi-protocol digital communicator/data modem. Operates using Vodafone's[®] PAKNET™ data transmission network for maximum signal integrity. Provides full dual signalling when used in conjunction with plug-on communicator modules. Enables full upload/download and system programming diagnostics.

Premier ComIP

The Premier ComIP module can be connected to any Premier control panel and allows the system to be connected to a Local or Wide Area Network (LAN/WAN). This allows alarms to be signalled over an IP network to an Alarm Receiving Centre via Texecom's Montex IP Receiver software. The Montex software also manages the polling of each monitored site. Upon connection to a network, Wintex upload/download software can be used to either locally or remotely program and interrogate the alarm system, via the Internet.

Premier Speech Module

The Speech Module provides two recordable 12 second audio messages. Each message is assigned to an alarm channel, which in turn can be triggered from one of the many output functions of the control panel. The Speech Module is compatible with the Premier 816 Plus and Premier 832 control panels.

[†]On supporting data networks.

Premier Home Automation & Access Control

Always pushing back the boundaries of features and functions, Premier Series control panels now have additional home automation and access control building management capabilities.

Home Automation

Premier X10-Com

The X10-Com module can be connected to the Premier 48/88/168/640 control panels and allows the control panel to act as a simple home automation controller. The X10-Com simply connects to an X10 power line interface which in turn is plugged or hard wired into the mains supply circuit of the protected premises. Up to eight uniquely controlled X10 devices, such as wall sockets and light switches can then be controlled via the control panel.

Access Control

Premier iProx

The Premier iProx can be connected to the Premier Series control panels and provides support for Texecom Proximity Tags. Other standard 26 bit wiegand readers can also be interfaced allowing alternative tags or cards to be used with Premier control panels. The unit can also be used in a stand-alone mode whereby tags can be learnt and stored locally, thus allowing the unit to be used as a single door access controller.

Premier External iProx Coil

Designed for use with the Premier iProx and Texecom Proximity Tags, the Premier External iProx Coil allows the user to disarm the alarm system externally. The unit can also function as a single door access controller, by using it as a stand alone module with the Premier iProx.

Premier Software & Peripherals

Upload/Download Software

Wintex Software

Texecom's user-friendly Windows™ based software, designed for use with the Premier Series of control panels, provides complete upload/download and systems diagnostics for total control and flexibility.

Windows is a registered trademark of Microsoft Corporation

Monitoring Software

Montex Software

Software based alarm receiver interface for connecting with Premier ComIP alarm signalling equipment. Supports fast format, contact ID and SIA communication protocols. Manages received polling information for each monitored site.

Alarm Management Software

Texbase Software

Texbase is an alarm management software package designed for use in conjunction with the Premier Com IP and Montex software, ideally suited to installers who wish to individually monitor their installed security systems for specific alarm signals. Texbase is event selectable, features include printable reports, detailed account history and alarm status emailing.

Software Peripherals

Key-Fob Programmer

The Key-fob Programmer allows configuration data to be copied from one control panel to another. This reduces programming time and simplifies set-up of multiple system installations.

USB-Modem

Designed specifically for use with Wintex UDL software and a PC to allow trouble free uploading/downloading with Premier Series and Premier International Series control panels.

PC-Com

Serial interface connector for connection between control panel and PC, enabling local upload/download.

Uni-Com

Universal modem connector. Enables connection between control panel and serial communication devices for remote upload/download.

USB-Com

USB interface connector for connection between control panel and PC, enabling local upload/download.

Print-Com

Serial interface connector for connection between panel and serial type printers, enabling print-out of system events.

Veritas Series

The best selling Veritas Series continues to out-perform all other residential and light commercial control panels with a winning combination of outstanding features and exceptional reliability.

Veritas 8

G1

Best selling stand alone control panel. Features 8 fully programmable zones and accepts up to 6 backlit remote keypads.

Veritas 8 Compact

G1

Slimline, discreet stand alone control panel. Features 8 fully programmable zones and accepts up to 6 backlit remote keypads. Nominated Product of the Year 2000 by PSI magazine.

Veritas R8

G1

Best selling control panels with remote keypad. Features 8 fully programmable zones and accepts up to 6 backlit remote keypads.

Veritas R8Plus

G2

Veritas R8 with additional features including EOL wiring, communicator interface and accepts Veritas Excel LCD keypads.

Veritas Excel

G2

All the features of the Veritas R8 Plus including an LCD keypad for even easier programming and operation.

Universal Programming Platform

Each Veritas control panel uses the same intuitive programming platform as the rest of the Veritas Series, ensuring instant product familiarity across the range.

8 Fully Programmable Zones Plus Tamper

Veritas panels features 8 fully programmable zones plus an additional global system tamper. Each zone can operate as any of 8 different zone types ensuring exceptional system flexibility.

Accepts Up To 6 Backlit Keypads

Accepting up to 6 backlit keypads, the Veritas Series provides outstanding system flexibility. Each Veritas can accept the Veritas RKP LED Keypad, whilst the Veritas R8 Plus and Veritas Excel can both accept the Veritas Excel LCD Keypad.

Veritas RKP

G2

LED keypad for use with any Veritas control panel. Features 8-zone LED indication, touch-tone backlit keys, removable hinged PCB chassis for simple installation and ergonomic design for ease of use.

Veritas Excel RKP

G2

LCD keypad for use with Veritas Excel and Veritas R8 Plus control panels. Features a 32-character LCD display, programmable zone and banner text, direct access to the 250 event log, simplified programming and ease of operation. Can also be used as an engineer's programming tool.

Speech Dialler

The Texecom Speech Diallers enable communication of alarm information to a standard or mobile telephone, with or without ARC[†] monitoring. Universal compatibility with all quality control panels, simple intuitive operation, additional SMS text messaging via the Speech and Text Dialler plus a host of powerful features ensure guaranteed protection every time.

[†]Alarm Receiving Centre

Speech Dialler

The Texecom Speech Dialler enables communication of alarm information to 8 contacts, which can be either standard or mobile telephone numbers. Featuring universal compatibility with all quality control panels, 4 trigger inputs, 4 voice messages up to 32 seconds in length and a host of additional functions.

Speech & Text Dialler

All the features of the Texecom Speech Dialler with additional SMS text messaging facility. Provides 4 text messages, each up to 32 characters in length.

Texecom RMU

Remote microphone unit. Enables listen-in mode in any location when used in conjunction with the Texecom Speech Dialler. Features adjustable sensitivity and selectable 'microphone active' LED indication.

External Sounders

Revolutionary from the outset, the Odyssey Series continues to out-perform all other external sounders on the market. With unprecedented reliability, superior mechanical construction and a host of standout features, each Odyssey delivers the quality required to withstand the harshest of installation environments.

Odyssey 1 & 1E**42**

The original Odyssey design provides a more modern approach to the traditional vertically mounted bell box style.

**Odyssey 2 & 2E****42**

With an additional expanse of screen printing area, the horizontally mounting Odyssey 2 and 2E shape is perfect for maximum deterrence and standout protection.

**Odyssey 3, 3E & 3M****42**

A design classic, the Odyssey 3, 3E and 3M style incorporates a distinctive 'shield' aesthetic - a perfect backdrop for any installation company's logo.

**Odyssey 4 & 4E****43**

Discreet, low profile styling provides an elegant and understated design solution.

**Odyssey 5 & 5E****43**

Contemporary architectural styling and new mechanical construction enhances strobe visibility whilst providing increased tamper protection. The 'billboard' effect, perfectly frames any installation company logo.

**Odyssey 5 Compact & 5E Compact****43**

Ultra compact low profile design ideal for internal or external installation. The ideal solution where size and aesthetics is a consideration, without sacrificing visibility and sounder volume.

Odyssey Series

The Odyssey Series from Texecom provides uncompromising solutions for any professional installation. Each Odyssey is equipped with an outstanding array of features that clearly redefine the standards that external sounders are judged by.

Each full Odyssey incorporates environmentally sealed microprocessor technology, twin piezo sounders and triple tamper detection guaranteeing exceptional performance. An ingenious patented safety engineer hold-off mode allows unprecedented ease of installation and maintenance whilst retaining maximum tamper security.

An economy 'E' version of each Odyssey unit is available, aimed at protecting residential premises that require maximum security at the most cost effective price. Utilising the same microprocessor technology throughout the Odyssey Series, each Odyssey E provides total reliability and ease of installation.

Free Screen Printing Service

Texcom's in-house screen printing service can personalise any Odyssey design. With a minimum quantity requirement of 40 covers this free service can transform an external sounder into the perfect billboard, reinforcing an installation company's commitment to quality and performance.

Single or Twin Piezo Sounders

Maximising alarm volume whilst maintaining unparalleled reliability, each Odyssey contains the highest quality piezo sounders. With the single piezo 'E' versions providing 109dB(A) @ 1m, and the twin piezo 'full' versions delivering 115dB(A) @ 1m, clarity of alarm signalling is guaranteed.

Polycarbonate Construction

Each and every Texcom product is designed to exceed performance expectations and the Odyssey Series is no exception. All the external sounders feature 3mm polycarbonate exterior housings for ruggedness and durability.

Screw, Lid & Wall Tamper

Utilising only the highest quality microswitches, a variety of screw, lid and wall tamper combinations is available for complete protection and security.

IP65 Sealed Electronics

The Odyssey Series comprise of the first external warning devices to use a separate PCB terminal block cover, making access to electrical connections straightforward without any loss of weatherproofing. The addition of a gasket seal on all 'full' versions provides housing protection for the electronics to an IP65 rating, ideal for extreme weather conditions.

Powerful Strobe Indication

With each design incorporating a multi-faceted lens design, strobe visibility is maximised for superior performance. A strobe tube saver function automatically reduces the strobe alarm flash rate after an hour of continuous operation, maximising the life span of the strobe tube for greater reliability.

Patented Hold-Off Mode

A patented feature unique to Texcom, the engineer hold-off mode ensures installation and servicing is quick and easy. By providing the engineer with a method of communicating to an Odyssey device from any type of control panel, self-activation on tamper can be deactivated, allowing the engineer to remove power or open the bell box tamper without causing an alarm.

Galvanised Steel Option

For maximum security applications, the Odyssey 3M incorporates a 1.5mm galvanised steel backplate and inner cover assembly for additional durability and impact protection.

Odyssey Series

Odyssey 1

Vertically mounting external sounder and strobe unit. Features include: 115dB(A) @ 1m, IP65 sealed electronics, unique patented engineer hold-off mode and advanced microprocessor technology. Polycarbonate construction with screw, lid and wall tamper detection. Available in a range of colours.

Odyssey 1E

Economy version: 109dB(A) @ 1m, IP44 sealed electronics, screw and wall tamper detection.

Odyssey 2

Horizontally mounting external sounder and strobe unit. Features include: 115dB(A) @ 1m, IP65 sealed electronics, unique patented engineer hold-off mode and advanced microprocessor technology. Polycarbonate construction with screw, lid and wall tamper detection. Available in a range of colours.

Odyssey 2E

Economy version: 109dB(A) @ 1m, IP44 sealed electronics, screw and wall tamper detection.

Odyssey 3

Stylish hexagonal design external sounder and strobe unit. Features include: 115dB(A) @ 1m, IP65 sealed electronics, unique patented engineer hold-off mode and advanced microprocessor technology. Polycarbonate construction with screw, lid and wall tamper detection. Available in a range of colours.

Odyssey 3E

Economy version: 109dB(A) @ 1m, IP44 sealed electronics, lid and wall tamper detection.

Odyssey 3 Metal

1.5mm galvanised steel enclosure features: 115dB(A) @ 1m, IP65 sealed electronics and screw, lid and wall tamper detection.

Odyssey Series

Odyssey 4

Low profile design external sounder and strobe unit with 360° lens. Features include: 115dB(A) @ 1m, IP65 sealed electronics, unique patented engineer hold-off mode and advanced microprocessor technology. Polycarbonate construction with screw, lid and wall tamper detection. Available in a range of colours.

Odyssey 4E

Economy version: 109dB(A) @ 1m, IP44 sealed electronics, lid and wall tamper detection.

Odyssey 5

Stylish low profile design sounder and strobe unit with 270° lens. Features include: 115dB(A) @ 1m, IP65 sealed electronics, unique patented engineer hold-off mode and advanced microprocessor technology. Polycarbonate construction with adjustable lid & wall tamper and screw tamper detection. Available in a range of colours.

Odyssey 5E

Economy version: 109dB(A) @ 1m, IP44 sealed electronics, adjustable lid and wall tamper detection.

Odyssey 5 Compact

Ultra compact low profile design sounder and strobe unit with 270° lens. Features include: 115dB(A) @ 1m, IP65 sealed electronics, unique patented engineer hold-off mode and advanced microprocessor technology. Polycarbonate construction with adjustable lid and wall tamper detection. Available in a range of colours.

Odyssey 5E Compact

Economy version: 109dB(A) @ 1m, IP44 sealed electronics, adjustable lid and wall tamper detection.

Wireless

As an expanding range of reliable wireless security equipment, the RadioPlus Series provides additional solutions and greater system flexibility.

With intelligent integrated devices for use with Premier control panels, plus stand-alone relay based signalling for a variety of applications, the RadioPlus Series is available in both 433MHz and 868MHz frequency spectrums.

RadioPlus Intelligent Devices

46

Intelligent wireless devices for integration with Premier control panels.

RadioPlus Relay Devices

46

Stand-alone relay switching transmission systems for a variety of applications.

RadioPlus Series

The RadioPlus Series comprises a range of wireless devices for both security and other applications. The Network and Intelligent Receiver based RadioPlus devices comprise PIRs, keyfobs and magnetic contacts for connection to Premier control panels. This provides either complete wireless or hybrid hard-wired/wireless security systems.

The stand-alone relay switching option can be used for a variety of functions, ranging from security, lighting, garage door opening and many more applications.

All RadioPlus products comply with EN 50131-1 and EN 50131-5-3 Grade 2.

Wintex Wireless Diagnostics

Texcom's Wintex software provides complete diagnostics for wireless devices including signal strength and battery status, for complete system control and monitoring.

RadioPlus Series

All devices are available in a choice of either 433MHz or 868MHz.

RadioPlus Intelligent Devices

RadioPlus Intelligent Receiver

Allows complete integration of up to 32 compatible wireless devices with Premier control panels. Features include supervision timers, signal strength indication, low battery warning and unique user ID. Connects directly onto a Premier control panel com port or Premier 4XP.

RadioPlus Network Receiver

All the features of the RadioPlus Intelligent Receiver with the addition of an interface for connection onto a Premier control panel network. This allows greater flexibility on device locations and additional receivers to be added for increased wireless network coverage. Each Premier control panel can accept up to 32 wireless devices.

RadioPlus PIR

Digital wireless PIR with 15m volumetric coverage. Complete with selectable pulse count, rear wall tamper and mounting height adjustment. Typical 3-year battery life with 100m maximum transmission range.

RadioPlus Intelligent Keyfob

4-button iconic keyfob with dedicated buttons for arming, disarming, panic (PA) and part set, with 3 additional programmable functions. Advanced digital code hopping provides over 4 billion code combinations for complete signalling security. Features low battery warning, 100m maximum transmission range and 3-year typical battery life.

RadioPlus Magnetic Contact

Wireless magnetic contact with provision for two additional locally wired contacts. Features 100m maximum transmission range and 3-year typical battery life.

RadioPlus Relay Devices

RadioPlus Relay Receiver

Relay receiver for use with up to 50 Relay Keyfob button combinations. Contains two relays that can be switched remotely, with programmable momentary or latching operations. Can be used in numerous applications including security arming/disarming/panic (PA), garage door opening and many more.

RadioPlus Relay Keyfob

2-button programmable keyfob used in conjunction with the RadioPlus Relay Receiver. Features advanced code hopping, 100m maximum transmission range and 3-year typical battery life.

Power Supplies

Texcom power supplies and extensive range of sealed lead acid batteries continue to confirm a reputation for undeniable quality, reliability and exceptional value.

Texcom's additional peripheral products allow flexible, tailored power supply solutions for each individual installation.

Premier PSU200
Power
Alert

EN Calculator Software

Compatible with Texcom's full range of Premier Series, Premier International and Veritas control panels, the EN Calculator calculates current drawn from required peripheral products, and indicates whether the system will meet the battery standby times and maximum alarm current requirements stipulated under EN 50131-1. Available free to Texcom Registered Installers from the Texcom website, the EN Calculator is a vital tool for assessing individual installation battery requirements whilst simplifying and speeding up installation.

Power Supplies

Power Supplies

Premier PSU200

2 Amp microprocessor based power supply with fail-safe relay outputs for mains, battery and fuse monitoring. Compatible with a variety of quality control panels. Housing will accept 2 x independently monitored 7.2Ah batteries or a single 18Ah battery.

Premier PSU200XP

All the features of the PSU200 with the addition of a built-in Premier 8XP Zone Expander. Provides complete power supply signalling integration with Premier Series control panels.

Premier PSU Monitor

Allows a Premier series control panel to fully monitor the status of either a standard Telexcom PSU200 or any other manufactured PSU that provides voltage free fault outputs.

Premier Battery Splitter

Allows connection of two 7.2Ah batteries to a single set of terminals on a Premier Series control panel. Compliant with EN 50131-6 the Premier Battery Splitter independently monitors batteries, performing presence and load tests, signalling any faults to the control panel.

SLA Batteries

Telexcom's extensive range of 12V sealed lead acid batteries are available in 18Ah, 7.2Ah, 3.2Ah, 2.4Ah and 1.3Ah capacities.

Battery Capacity	18Ah	7.2Ah	3.2Ah	2.4Ah	1.3Ah
20 Hour Rate	18Ah	7.2Ah	3.2Ah	2.4Ah	1.3Ah
10 Hour Rate	16.2Ah	6.5Ah	3.0Ah	2.1Ah	1.15Ah
5 Hour Rate	15.3Ah	6.1Ah	2.7Ah	2.0Ah	1.0Ah

Internal Resistance Fully Charged Battery (20°C, 68°F)	18Ah	7.2Ah	3.2Ah	2.4Ah	1.3Ah
	20mΩ	25mΩ	38mΩ	45mΩ	61mΩ

Capacity Affected By Temperature	18Ah	7.2Ah	3.2Ah	2.4Ah	1.3Ah
40°C (104°F)	102%	102%	102%	102%	102%
20°C (68°F)	100%	100%	100%	100%	100%
0°C (32°F)	85%	85%	85%	85%	85%
